Forensic Testing Services

Forensics Services - Laboratory Testing Guide 2025

RJ Lee Group is recognized as a leading authority in the field of criminal forensics, especially gunshot residue analysis. It seamlessly collaborates with hundreds of agencies across the US and internationally. It fosters strong partnerships with law enforcement agencies, prosecutorial offices, public defenders, private defense attorneys, private investigators, and other forensic laboratories, actively supporting investigations and delivering dependable and unbiased forensic data.

RJ Lee Group's criminal forensics department is accredited by the American Association for Laboratory Accreditation (A2LA) and is accredited in gunshot residue analysis, as well as distance determination. Its scientists have also been qualified as experts in 37 of the United States of America, Washington DC, Puerto Rico, Bermuda, the British and US Virgin Islands, Canada, the Cayman Islands, New Zealand, St. Lucia, and Turks and Caicos.

RJ Lee Group specializes in achieving exceptional turnaround times for GSR analysis, including the efficient processing of backlogs. It even engages in evaluation and constructive critique of reports and data generated by other laboratories because it has a proven track record of providing criminal forensics services that consistently surpass both regulatory requirements and client expectations.
